Preprints

Students funded by me are indicated by * and other students are indicated by **. Stewart* is tenure-track Assistant Professor, Department of Statistics, Florida State University. Babkin* is Senior Data & Applied Scientist, Microsoft.

Schweinberger, Michael, Hu, Guanyu, Grieshop**, Nicholas and Yong Feng**. *A Bayesian approach to space- and time-indexed continuous-time stochastic processes for network data, with application to the Italian premier football league.* Submitted to *Statistica Sinica.*

Nandy**, Saikat, Holan, Scott H. and **Michael Schweinberger.** *A socio-demographic latent space approach to spatial data when geography is important but not all-important.* Submitted to *The Annals of Applied Statistics.*

Jeon, Minjeong and **Michael Schweinberger.** *Latent process models for monitoring progress towards hard-to-measure targets, with applications to online educational assessment data.* Submitted to *The Annals of Applied Statistics.*

Eli*, Sean and **Michael Schweinberger.** *Non-asymptotic model selection for models of network data with parameter vectors of increasing dimension.* Submitted to the *Journal of Statistical Planning and Inference.*

Stewart*, Jonathan R. and **Michael Schweinberger.** Pseudo-likelihood-based M-estimation of random graphs with dependent edges and parameter vectors of increasing dimension. Revised and resubmitted to *The Annals of Statistics.*

Accepted and published peer-reviewed articles

Students funded by me are indicated by * and other students are indicated by **. Stewart* is tenure-track Assistant Professor, Department of Statistics, Florida State University. Babkin* is Senior Data & Applied Scientist, Microsoft.
