

Preprints

Past and present students funded by me are indicated by *. Students funded by collaborators and others are indicated by **.

Stewart*, Jonathan R. and **Michael Schweinberger**. Pseudo-likelihood-based M -estimation of random graphs with dependent edges and parameter vectors of increasing dimension. Submitted.

Jin, Ick Hoon, Jeon, Minjeong, **Schweinberger, Michael**, and Lizhen Lin. Hierarchical network item response modeling for discovering differences between innovation and regular school systems in Korea. Submitted.

Sean Eli* and **Michael Schweinberger**. *Non-asymptotic model selection for models of network data with parameter vectors of increasing dimension*. Submitted.

Jeon, Minjeong, **Schweinberger, Michael**, Baugh**, Samuel, and Eric Ho**. *Student learning through learning progression maps, with application to online educational assessment data*. To be submitted.

With Johannes Lederer. *Scalable model selection with a single observation of dependent random variables: pseudolikelihood-based Dantzig selectors*.

With Johathan R. Stewart*. *Composite likelihood in dependent-data problems with parameter vectors of increasing dimension*.

Publications
