Michael Schweinberger

Professor
Department of Statistics
Eberly College of Science
The Pennsylvania State University

Positions

July 2024–present Full Professor with tenure, Department of Statistics, Eberly College of Science, The Pennsylvania State University, University Park, PA, USA

July 2022–June 2024 Associate Professor with tenure, Department of Statistics, Eberly College of Science, The Pennsylvania State University, University Park, PA, USA

July 2021–August 2022 Visiting Assistant Professor, Department of Statistics, College of Arts and Sciences, University of Missouri, Columbia, MO, USA

July 2013–June 2021 Assistant Professor, Department of Statistics, George R. Brown School of Engineering, Rice University, Houston, TX, USA

January–July 2017 Visiting Scholar, Department of Statistics, College of Arts and Sciences, University of Washington, Seattle, WA, USA

July 2009–June 2013 Research Associate, Department of Statistics, Eberly College of Science, The Pennsylvania State University, University Park, PA, USA

July 2007–June 2009 Research Associate, Department of Statistics, College of Arts and Sciences, University of Washington, Seattle, WA, USA

Education

5/2007 Ph.D.: *Statistical Methods for Studying the Evolution of Networks and Behavior*, University of Groningen, NL; advisor: Tom A.B. Snijders; Ph.D. committee: Ove Frank, Department of Statistics, University of Stockholm, Sweden; Mark S. Handcock, Department of Statistics, University of Washington, Seattle, WA, USA; Herbert J.A. Hoijtink, Department of Methodology and Statistics, University of Utrecht, NL.

8/2002 Doctorandus (undergraduate degree in NL ∼ B.A./M.A. in USA), with distinction, University of Groningen, NL. Sociology and Statistics & Measurement Theory. Scriptie (B.A./M.A. thesis in USA) in Department of Statistics & Measurement Theory (advisor: Tom A.B. Snijders). Degree issued by Department of Sociology, because Department of Statistics & Measurement Theory did not have graduation rights.

Editorial positions

- 2022–present Associate Editor, Journal of Computational and Graphical Statistics

- 2016–present Section Editor, Journal of Statistical Software

- 2024–present Associate Editor, Econometrics and Statistics, Part B: Statistics

- 2021–2024 Associate Editor, Computational Statistics & Data Analysis

- 2020–2021 Guest Editor, Special issue "Statistical Analysis of Networks" by Statistical Methods & Applications (Journal of the Italian Statistical Society)

Research honors

2017 William D. Richards Software Award of the International Network for Social Network Analysis awarded to the core development team of the statistical software packages `(R)Siena`. I was a member of the core development team of `Siena` (2002–2007) and helped design and build the statistical engine of `Siena`, including likelihood-based inference for continuous-time Markov processes for networks based on incomplete data; uncertainty quantification; score-type tests; and latent variable model extensions. `RSiena` is a translation of the statistical software package `Siena` from `Delphi` into `R/C++` and the statistical engine of `RSiena` is based on the statistical engine of `Siena`.

2007 Netherlands Organisation for Scientific Research (NWO): NWO award Rubicon-44606029. The Rubicon award is a young investigator award of the NWO. The NWO is the Dutch equivalent of the National Science Foundation (NSF).

Research, consulting, and travel grants

More than $1 million in research funding as Principal Investigator since 2015. Funding sources include U.S. sources (NSF, DoD) and European sources (NWO).

2021–2025 **Lead Principal Investigator:** U.S. Department of Defense – Army Research Office (with Co-PI Johan Koskinen, University of Melbourne, Australia and Co-PI Pavel N. Krivitsky, University of New South Wales, Sydney, Australia): ARO award W911NF-21-1-0335. $650,429. *Covert networks: How to learn as much as possible about the structure of a network from sampled subnetworks.* **Brought W911NF-21-1-0335 to Rice University and then transferred W911NF-21-1-0335 to the University of Missouri, Columbia. Upon moving to the Pennsylvania**

State University, the remaining funds of $249,214 were subawarded by the University of Missouri, Columbia to the Pennsylvania State University.

2018–2021 **Sole Principal Investigator:** National Science Foundation (NSF), Division of Mathematical Sciences (DMS), Statistics: NSF award DMS-1812119. $150,000. *Statistical inference for networks with complex topological structures.*

2015–2019 **Sole Principal Investigator:** National Science Foundation (NSF), Division of Mathematical Sciences (DMS), Statistics: NSF award DMS-1513644. $200,001. *Next-generation random graph models.*

2007–2009 **Sole Principal Investigator:** Netherlands Organisation for Scientific Research (NWO): NWO award Rubicon-44606029. EUR 65,520 ($88,759). *Longitudinal network and behavior data: Markov models and latent variables.* The NWO is the Dutch equivalent of the National Science Foundation (NSF).

2006–2006 **Sole Principal Investigator:** Award from Foundation ProGAMMA, Groningen, NL. *Longitudinal network and behavior data: Markov models.*

2022–2023 **Consultant:** The Center for Health Promotion and Prevention Research, The University of Texas Health Science Center at Houston, TX

2018–2019 **Consultant:** NIH / NIMH award 1R01MH100021 *YMAP: Young Men's Affiliation Project of HIV risk and prevention venue.*

2017–2019 **Consultant:** NIH / NIGMS award 1R21GM113694: *iMAN: integrated Molecular & Affiliation Network analysis of HIV transmission.*

2009 **Travel award** by the University College Dublin, Ireland to attend the workshop on Statistical Methods for the Analysis of Network Data in Practice, University College Dublin, Ireland.

2008 **Travel award** by the Center for Statistics and the Social Sciences, University of Washington, Seattle, WA, USA to attend the International Sunbelt Social Networks Conference, St. Pete Beach, FL, USA.

2004 **Travel award** by the European Union to attend the World Bernoulli Congress and Annual Meeting of the Institute of Mathematical Statistics, Barcelona, Spain.

Preprints to be submitted to refereed journals

Students and postdoctoral scholars funded by me are indicated by *. Students and postdoctoral scholars funded by others are indicated by **.

Bhadra*, Subhankar and **Michael Schweinberger.** *Characterizing direct and indirect causal effects when outcomes are dependent due to treatment and outcome spillover.* Tentative target: *The Annals of Statistics* (late 2024).

Jeon, Minjeong and **Michael Schweinberger.** *An exploratory approach to individual progress based on time-dependent interaction maps.* Tentative target: *Psychological Methods* (late 2024).

Fritz*, Cornelius, Georg, Co-Pierre, Mele, Angelo and **Michael Schweinberger.** *Vulnerability webs: Systemic risk in software networks.* To be submitted (late 2024). **The order of authors is alphabetical.**

Publications in refereed journals

Students and postdoctoral scholars funded by me are indicated by *. Students and postdoctoral scholars funded by others are indicated by **.

Fritz*, Cornelius, **Schweinberger, Michael,** Bhadra*, Subhankar, and David R. Hunter (2024+). *A regression framework for studying relationships among attributes under network interference.* Under review by the *Journal of the American Statistical Association, Theory & Methods.* **Corresponding author.**

Nandy**, Saikat, Holan, Scott H. and **Michael Schweinberger** (2024+). A socio-demographic latent space approach to spatial data when geography is important but not all-important. Under review by the *International Statistical Review.* **Invited.**

Stewart*, Jonathan R. and **Michael Schweinberger** (2024+). Pseudo-likelihood-based M-estimation of random graphs with dependent edges and parameter vectors of increasing dimension. Under review by *The Annals of Statistics.*

Grieshop**, Nicholas, Feng**, Yong, Hu, Guanyu and **Michael Schweinberger** (2024+). A continuous-time stochastic process for high-resolution network data in sports. Accepted by *Statistica Sinica.* **Invited.**

Eli*, Sean and **Michael Schweinberger** (2024). Non-asymptotic model selection for models of network data with parameter vectors of increasing dimension. *Journal of Statistical Planning and Inference*, 233, 106173.

Jeon, Minjeong and **Michael Schweinberger** (2024). Latent process models for monitoring progress towards hard-to-measure targets, with applications to mental health and online educational assessments. *The Annals of Applied Statistics*, 18, 2123–2146. **Equal contributions. The order of authors is alphabetical.**

Research software, including manuals

Fritz, Cornelius, Schweinberger, Michael, Komatsu, Shota, Dahbura, Juan Nelson Martínez, Nishida, Takanori, and Angelo Mele (created, maintained, and updated since 2024). `R` package bigergm. **Please note:** `bigergm` is an evolution of `R` packages `hergm` (created by me in 2010) and `lighthergm` (created by Sansan Inc. in 2021). It can estimate network models with local dependence from networks with up to 300,000 nodes. **More than 2,000 downloads from the RStudio CRAN mirror since 2024.**

Schweinberger, Michael, Handcock, Mark S., Stewart, Jonathan, Babkin, Sergii, Vu, Duy Q., and Pamela Luna (created, updated, and maintained by me since 2010). `R` package hergm. **More than 88,000 downloads from the RStudio CRAN mirror since 2010.**

Stewart, Jonathan R. and Michael Schweinberger (created, updated, and maintained by Stewart since 2018). `R` package mlergm. **More than 29,000 downloads from the RStudio CRAN mirror since 2018.**

Snijders, Tom A.B., Steglich, Christian E.G., Schweinberger, Michael, and Mark Huisman (created, updated, and maintained by Snijders since 2000). Siena. Created in 2000 as software package `Siena` and translated into `R` package `RSiena` in the late 2000s. **More than 207,000 downloads from the RStudio CRAN mirror since 2012.**

Schweinberger, Michael (2003). Ultras. Created by me in 2003.

Research presentations

I have given more than 110 presentations, including 83 invited presentations, in Australia, Singapore, India (Indian Statistical Institute), Switzerland, the European Union, the United Kingdom, the United States, Mexico, and Canada.

Invited plenary presentations

83. 2015 Plenary Presentation "Statistical Analysis of Network Data" at the Annual Meeting of the German Statistical Society, Hamburg, Germany: Exponential-family random graph models with local dependence.

Invited public presentations

82. 2025 Spring Public Lecture, Department of Statistics, Pennsylvania State University: Learning from data in an interconnected and interdependent world.

Other invited presentations

81. 2025 Institute of Mathematical Statistics (IMS) workshop "Frontiers of Statistical Network Analysis: Inference, Tensors and Beyond", Institute for Mathematical Sciences, National University of Singapore: Title to be announced.

80. 2024 Duisterbelt meeting at ETH Zürich, Switzerland: A regression framework for studying relationships among attributes under network interference.

79. 2024 International Conference on Computational and Methodological Statistics (CM-Statistics 2024), London, UK: A regression framework for studying relationships among attributes under network interference: statistical theory.

78. 2024 American Statistical Association (ASA) Statistical Learning and Data Science Conference, Irvine, CA: A regression framework for studying relationships among attributes under network interference.

77. 2024 Department of Statistics, Florida State University: A regression framework for studying relationships among attributes under network interference.

76. 2024 Department of Statistics, Operations Research, and Data Science, Fox School of Business, Temple University: A generalization of GLMs for studying relationships among attributes under network interference.

75. 2023 Keystone State Statistics Symposium, Department of Statistics, Pennsylvania State University: A scalable statistical platform for learning from discrete and dependent attribute and network data.

74. 2023 JASA A&CS Special Invited Session at the Joint Statistical Meetings, Toronto, Canada: Discussion of "A tale of two datasets: Representativeness and generalisability of inference for samples of networks" by Pavel N. Krivitsky, Pietro Coletti, and Niel Hens (2023). Presented by Cornelius Fritz.

73. 2023 Joint Statistical Meetings, Toronto, Canada: A latent process model for monitoring progress towards hard-to-measure targets, with applications to mental health and online educational assessments. Presented by Minjeong Jeon.

72. 2023 DSSV-ECDA Conference (DDSV: Data Science, Statistics & Visualization; ECDA: European Conference on Data Analysis), Antwerp, Belgium: A geometric approach to convergence rates for graphical models based on a single observation of discrete and dependent network and attribute data.

71. 2022 International Conference on Computational and Methodological Statistics (CM-Statistics 2022), London, UK: Scalable population models of random attributes and random networks.

70. 2022 International Symposium on Nonparametric Statistics, Paphos, Cyprus: Pseudo-likelihood-based M-estimation of random graphs with dependent edges and parameter vectors of increasing dimension.

69. 2022 Mini-symposium on "High Performance Statistical Computing (HPSC): Challenges and Best Practices" at the SIAM Conference on Parallel Processing for Scientific Computing (PP21), Seattle, WA: Scalable statistical learning from dependent data based on regularized and unregularized decomposable loss functions.

68. 2021 Department of Mathematics, Free University of Amsterdam, NL (Virtual): Scalable statistical learning from dependent, high-dimensional, and structured data.

67. 2021 Faculty of Sciences, University of Konstanz, Germany (Virtual): Scalable statistical learning from dependent, high-dimensional, and structured data.

66. 2021 Faculty of Politics, Law and Economics, University of Konstanz, Germany (Virtual): Statistical learning from high-dimensional data arising in the social and behavioral sciences.

65. 2021 Department of Statistics, Pennsylvania State University: Scalable statistical learning from dependent, high-dimensional, and structured data.

64. 2021 Department of Statistics, University of Missouri, Columbia (Virtual): Learning from dependent, high-dimensional, and structured data: network, spatial, and temporal data.

63. 2021 Joint Statistical Meetings, Seattle, WA (Virtual): Scalable estimation of network models with dependent edges and parameter vectors of increasing dimension based on pseudolikelihood functions.

62. 2021 Statistics Seminar Series, School of Mathematics and Statistics, University of New South Wales, Sydney, Australia (Virtual): Learning from dependent, high-dimensional, and structured data: network, spatial, and temporal data.

61. 2021 Department of Biostatistics and Data Science, University of Texas, School of Public Health, Houston (Virtual): Learning from network data, with applications to the spread of infectious diseases.

60. 2021 School of Computer Science, Carnegie Mellon University (Virtual): Scalable models of social networks and scalable learning from social network data, with theoretical guarantees.

59. 2021 Department of Network and Data Science, Central European University (Virtual): Scalable learning from data about an interconnected and interdependent world.

58. 2021 Department of Statistics, London School of Economics and Political Science, London, UK (Virtual): Scalable statistical learning of models of an network models in single-observation scenarios with $p \to \infty$ parameters, with statistical guarantees.

57. 2021 Mathematics Institute, Leiden University, NL (Virtual): Foundations of learning from network data without independent replications.

56. 2021 Department of Statistics and Actuarial Science, University of Waterloo, Canada (Virtual): Scalable statistical learning of network models in high-dimensional $n = 1$ and $p \to \infty$ scenarios, with statistical guarantees.

55. 2021 Department of Statistics, George Mason University, VA (Virtual): Scalable statistical learning of network models in high-dimensional $n = 1$ and $p \to \infty$ scenarios, with statistical guarantees.

54. 2020 International Conference on Computational and Methodological Statistics (CM-Statistics 2020), London, UK (Virtual): A probabilistic framework for models of dependent network data, with computational advantages and statistical guarantees.

53. 2020 Joint Statistical Meetings, Philadelphia, PA (Virtual): Statistical models of brokerage in social networks: models, methods, and theory. Presented by Jonathan Stewart.

52. 2020 Joint Statistical Meetings, Philadelphia, PA (Virtual): Generalized β-models with dependent edges capturing brokerage.

51. 2019 Department of Mathematics & Statistics, Old Dominion University: High-dimensional multivariate time series with spatial structure.

50. 2018 Social Networks Lab, ETH Zürich, Switzerland: How to reason, and how not to reason, about a connected world.

49. 2018 International Conference on Computational and Methodological Statistics (CM-Statistics 2018), Pisa, Italy: Finite-graph superpopulation inference for random graphs with complex topological structures.

48. 2018 Department of Applied and Computational Mathematics and Statistics, University of Notre Dame: High-dimensional multivariate time series with spatial structure.

47. 2018 Computational and Integrative Biomedical Research Center, Baylor College of Medicine: High-dimensional multivariate time series with spatial structure.

46. 2018 School of Mathematics and Applied Statistics, University of Wollongong, Australia: High-dimensional multivariate time series with spatial structure.

45. 2018 Alan Turing Institute, London, UK: Concentration and consistency results for random graph models with transitivity.

44. 2018 Department of Statistics, Rice University: How to reason, and how not to reason, about a connected world.

43. 2017 International Conference on Computational and Methodological Statistics (CM-Statistics 2017), London, UK: Consistent maximum likelihood estimation of random graph models with local dependence and growing neighborhoods.

42. 2017 Department of Statistics, University of Washington, Seattle: Statistical inference for exponential-family random graph models with additional structure: theoretical and computational advances.

41. 2016 International Conference on Computational and Methodological Statistics (CM-Statistics 2016), London, UK: High-dimensional multivariate time series with additional structure.

40. 2016 ICSA Applied Statistics Symposium, Atlanta, GA: Consistent estimation of curved exponential-family random graph models with local dependence and growing neighborhoods.

39. 2016 Institute of Statistics, University of Munich, Germany: Consistent estimation of curved exponential-family random graph models with local dependence and growing neighborhoods.

38. 2016 Department of Mathematics, University of Houston: The Ising model of network science: exponential-family random graph models with local dependence.

37. 2016 Department of Statistics, Rice University: Dependent and high-dimensional data: random graphs and graphical models.

36. 2015 Department of Applied and Computational Mathematics and Statistics, University of Notre Dame: Exponential-family random graph models with local dependence.

35. 2015 ICSA Applied Statistics Symposium and 13th Graybill Conference, Colorado State University: Exponential-family random graph models with local dependence.

34. 2015 UC Davis Statistical Sciences Symposium "Network Data: Information and Sciences," University of California, Davis: Exponential-family random graph models with local dependence.

33. 2015 Computational and Integrative Biomedical Research Center, Baylor College of Medicine: High-dimensional exponential-family models of networks with applications: challenges and opportunities.

Contributed presentations

29. 2023 International Sunbelt Social Network Conference, Portland, OR: Learning joint probability models of networks and epidemics from sampled and missing data, with application to the spread of coronavirus MERS in South Korea, 2015.

28. 2022 Stochastic Modeling and Computational Statistics, Department of Statistics, Pennsylvania State University: Learning about an interdependent and interconnected world, without replications (in the conventional sense of the word).

27. 2021 International Sunbelt Social Network Conference, Washington, D.C. (Virtual): Scalable estimation of network models, with statistical guarantees. Presented by Jonathan Stewart.

26. 2020 International Sunbelt Social Network Conference, Paris, France (Virtual): What can we learn about ERGMs?

25. 2019 International Sunbelt Social Network Conference, Montreal, Canada: Multilevel ERGMs with overlapping subsets of nodes: models, methods, and mathematical-statistical theory. Presented by Jonathan Stewart.

24. 2019 International Sunbelt Social Network Conference, Montreal, Canada: Generalizability and subgraph-to-graph estimation of ERGMs with multilevel structure.

23. 2018 The IEEE/ACM International Conference on Social Networks Analysis and Mining, Barcelona, Spain: A two-stage working model strategy for network analysis under Hierarchical Exponential Random Graph Models.

22. 2018 International Sunbelt Social Network Conference, Utrecht, NL: Finite-graph concentration and consistency results for ERGMs with transitive edge terms, GWESP terms, and other sensible model terms.

21. 2018 International Sunbelt Social Network Conference, Utrecht, NL: Multilevel network data facilitate statistical inference for curved ERGMs with geometrically weighted terms. Presented by Michal Bojanwoski.

20. 2016 Rice Data Science Conference, Houston, TX: High-dimensional graphical models and random graphs. Poster presentation.

19. 2016 International Sunbelt Social Network Conference, Newport Beach, CA, USA: Consistent estimation of multilevel exponential-family random graph models.

18. 2015 Joint Statistical Meetings, Seattle, WA, USA: Large-scale estimation of high-dimensional multivariate time series with local dependence. Presented by Sergii Babkin.

17. 2015 International Sunbelt Social Network Conference, Brighton, UK: Consistent estimation of the dependence structure of exponential-family random graph models given a single observation of a large random graph.

16. 2014 Joint Statistical Meetings, Boston, MA, USA: Local Dependence in Random Graph Models: Characterization, Properties, and Statistical Inference.

15. 2014 International Sunbelt Social Network Conference, St. Pete Beach, FL, USA: A Central Limit Theorem for Exponential-Family Random Graph Models with Local Dependence.

14. 2012 International Sunbelt Social Network Conference, Los Angeles, CA, USA: Hierarchical exponential-family random graph models: local versus global dependence.

13. 2011 International Sunbelt Social Networks Conference, St. Pete Beach, FL, USA: Viable and non-viable models of cross-sectional and longitudinal network data.

12. 2010: International Sunbelt Social Networks Conference, Riva del Garda, Italy: Instability and near-degeneracy of exponential-family random graph models.

11. 2010: International Sunbelt Social Networks Conference, Riva del Garda, Italy: Disaster networks.

10. 2009 Workshop: Statistical Methods for the Analysis of Network Data in Practice, University College Dublin, Ireland: Hierarchical extensions of exponentially-parameterized random graph models.

9. 2009 International Sunbelt Social Network Conference, San Diego, CA, USA: Toward a solution of the near-degeneracy problem of exponential-family random graph models.

8. 2008 International Sunbelt Social Networks Conference, St. Pete Beach, FL, USA: Discrete-time versus continuous-time Markov models.

7. 2005 Annual Meeting of the Psychometric Society, Tilburg, NL: Random effects models for digraph panel data.

6. 2005 International Multilevel Conference, Amsterdam, NL: Random effects models for digraph panel data.

5. 2005 International Sunbelt Social Network Conference, Los Angeles, CA, USA: Network dynamics with heterogeneous actors: developments.

4. 2004 World Bernoulli Congress and Annual Meeting of the Institute of Mathematical Statistics, Barcelona, Spain: Digraph dynamics with heterogeneous vertices.

3. 2004 International Sunbelt Social Network Conference, Portoroz, Slovenia: Network dynamics with heterogeneous actors.

2. 2003 International Sunbelt Social Networks Conference, Cancun, Mexico: Settings in social networks.

1. 2002 Lilnet Conference, Lille, France: Settings in social networks.

Workshops

12. 2025 Institute of Mathematical Statistics (IMS) workshop "Frontiers of Statistical Network Analysis: Inference, Tensors and Beyond", Institute for Mathematical Sciences, National University of Singapore. **Invited presentation.**

11. 2024 Workshop Next-level Exponential Random Graph Models for large Networks, International Sunbelt Social Network Conference, Edinburgh, Scotland. **Co-organizer (with Cornelius Fritz).**

10. 2021 Online Teaching Certification Seminar, University of Missouri, Columbia, MO, USA. **Participant.**

9. 2019 Workshop: Using Models to Estimate Hog Production, Committee on National Statistics, National Academies of Sciences, Engineering and Medicine (NASEM), Washington, D.C. **Invited discussant.**

8. 2013 Workshop: Exponential Random Network Models, American Institute of Mathematics, Palo Alto, CA, USA, organized by Sourav Chatterjee, Persi Diaconis, Susan Holmes, and Martina Morris. **Invited participant.**

7. 2012 Workshop: Algorithmic and Statistical Approaches for Large Social Network Data Sets, Conference on Neural Information Processing Systems, Lake Tahoe, NV, USA. **Contributed poster.**

6. 2009 Workshop: Statistical Methods for the Analysis of Network Data in Practice, University College Dublin, Ireland. **Travel award. Contributed presentation.**

5. 2009 Summer Institute in Statistics and Modeling in Infectious Diseases, University of Washington, Seattle, WA, USA. **Invited presentation.**

4. 2006 Workshop on Simulation-based Statistical Inference for the Evolution of Social Networks, University of Groningen, NL. **Invited presentations.**

3. 2005 Workshop on Simulation-based Statistical Inference for the Evolution of Social Networks, University of Groningen, NL. **Invited presentations.**

2. 2004 Workshop: Bayesian Model Selection, University of Utrecht, NL. **Participant and discussant.**

1. 2003 Workshop: Social Network Analysis and its Applications, Indian Statistical Institute, Kolkata, India. **Invited presentations and panelist.**

Academic teaching

Courses developed

Stat 648 (Rice University), *Stat 9100* (University of Missouri, Columbia), *Stat 597* (Pennsylvania State University): *Statistical Learning with Networks.* An introduction to three popular streams of research in statistics, machine learning, and artificial intelligence involving graphs: graphs representing data structure (network data), model structure (e.g., conditional independence structure: graphical models), and mathematical and computational operations (e.g., neural networks), including statistical models, scalable computing, and statistical theory in low- and high-dimensional scenarios. I have taught these courses 9 times between 2014 and 2022.

Courses taught

Stat 416 + Math 416: Stochastic Modeling. Target group: undergraduate students in statistics, mathematics, engineering, and computer science at the Pennsylvania State University. Contents: An introduction to the theory of stochastic processes, covering the mathematical properties of discrete- and continuous-time Markov chains and Markov chain Monte Carlo, with applications to chatbots and Boltzmann machines in artificial intelligence. Instructor: spring 2023, fall 2024, spring 2025.

Stat 415 + Math 415: Introduction to Mathematical Statistics. Target group: undergraduate students in statistics, mathematics, engineering, and computer science at the Pennsylvania State University. Contents: An introduction to mathematical statistics. Instructor: spring 2024: two sections with separate lectures; spring 2025.

Stat 597: Statistical Learning with Networks. Target group: graduate students in statistics and data science at the Pennsylvania State University. Contents: An introduction to three popular streams of research in statistics, machine learning, and artificial intelligence involving graphs: graphs representing data structure (network data), model structure (e.g., conditional independence structure: graphical models), and mathematical and computational operations (e.g., neural networks), including statistical models, scalable computing, and statistical theory in low- and high-dimensional scenarios. Instructor: fall 2022.

Stat 9100: Statistical Learning with Networks. Target group: graduate students in statistics and data science at the University of Missouri, Columbia. Contents: An introduction to three popular streams of research in statistics, machine learning, and artificial intelligence involving graphs: graphs representing data structure (network data), model structure (e.g., conditional independence structure: graphical models), and mathematical and computational operations (e.g., neural networks), including statistical models, scalable computing, and statistical theory in low- and high-dimensional scenarios. Instructor: spring 2022.

Stat 4710 + Stat 7710: Introduction to Mathematical Statistics. Target group: undergraduate students in statistics, mathematics, engineering, and computer science at the University of Missouri, Columbia. Contents: Introduction to the theory of probability and statistics using concepts and methods of calculus. Instructor: fall 2021, two sections of Stat 4710 + Stat 7710 with separate lectures (both in-person).

Stat 648: Graphical Models and Networks. Target group: graduate students in statistics and data science at Rice University. Contents: An introduction to three popular streams of research in statistics, machine learning, and artificial intelligence involving graphs: graphs representing data structure (network data), model structure (e.g., conditional independence structure: graphical models), and mathematical and computational operations (e.g., neural networks), including statistical models, scalable computing, and statistical theory in low- and high-dimensional scenarios. Instructor: spring 2014, spring 2015, spring 2016, fall 2017, fall 2018, spring 2020, spring 2021.

Stat 419 + Stat 519: Statistical Inference. Target group: senior undergraduate and graduate students in statistics at Rice University. Contents: Introduction to statistical

inference based on Casella and Berger's *Statistical inference.* Instructor: spring 2018, spring 2019, spring 2020.

Stat 532: Foundations of Statistical Inference I. Target group: graduate students in statistics at Rice University. Contents: Measure-theoretic statistical theory based on the first chapters of Shao's *Mathematical Statistics*, including an introduction to measure-theoretic probability and statistics. Instructor: fall 2019.

Stat 310 + Econ 307: Probability and Statistics. Target group: undergraduate students in statistics, mathematics, engineering, and computer science at Rice University. Instructor: fall 2013, fall 2014, fall 2015, spring 2016, fall 2016.

Stat 401: Experimental Methods. Target group: undergraduate students in statistics, mathematics, engineering, and computer science at the Pennsylvania State University. Instructor: summer 2012, fall 2012.

An Introduction to Probability Theory. Target group: undergraduate students in artificial intelligence (AI), co-taught with Anne Boomsma, at the University of Groningen, NL. Instructor: spring 2004.

Multivariate Statistics. Target group: undergraduate students in the social sciences at the University of Groningen, NL. Teaching assistant: spring 2004, spring 2005, fall 2005.

Academic advising

Postdoctoral researchers

August 2023–present Subhankar Bhadra, Department of Statistics, Pennsylvania State University.

April 2023–July 2024 Cornelius Fritz, Department of Statistics, Pennsylvania State University (with David R. Hunter). **First position: tenure-track Assistant Professor, School of Computer Science and Statistics, Trinity College Dublin, University of Dublin, Ireland.**

Chair of Ph.D. committee

2015–2020 Sole advisor of Jonathan R. Stewart, graduated May 2020. **First position: tenure-track Assistant Professor, Department of Statistics, Florida State University.** Thesis: *Consistent estimation of high-dimensional random graph models*

with dependent edge variables. Department of Statistics, Rice University. Winner of the inaugural James R. Thompson graduate student award.

2014–2017 Sole advisor of Sergii Babkin, graduated May 2017. **First position: Data & Applied Scientist, Microsoft. Current position: Senior Data & Applied Scientist, Microsoft.** Thesis: *High-dimensional and dependent data with additional structure.* Department of Statistics, Rice University.

Member of Ph.D. committee

2024–present Ph.D. committee of Abby Sine, Department of Statistics, Pennsylvania State University (chair: Neil Hatfield)

2023–present Ph.D. committee of Alyssa Hu, Department of Statistics, Pennsylvania State University (chair: Matthew Beckman)

2023–present Ph.D. committee of Ashmita Bhattacharya, Department of Civil and Environmental Engineering, Pennsylvania State University (chair: Konstantinos Papakonstantinou)

2022–present Ph.D. committee of Olivia Louise Beck, Department of Statistics, Pennsylvania State University (chair: Nicole Lazar)

2022–2024 Ph.D. committee of Alina Kuvelkar, Department of Statistics, Pennsylvania State University (graduation: August 2024; chair: David R. Hunter)

2018–2020 Ph.D. committee of Fengdan Ye, Department of Physics, Rice University (graduation: fall 2020; chair: Maria Pascual, Houston Methodist)

2017–2020 Ph.D. committee of Siyi Chen, Department of Statistics, Rice University (graduation: fall 2020; chair: Marek Kimmel, Rice University)

2017–2018 Ph.D. committee of Ryan Warnick, Department of Statistics, Rice University (graduation: fall 2018; chair: Marina Vannucci, Rice University)

2016–2017 Ph.D. committee of Ming Cao, Department of Biostatistics, University of Texas, Health Science Center, Houston (graduation: fall 2017; chair: Wenyaw Chan, University of Texas, School of Public Health, Houston)

2016–2017 Ph.D. committee of Yulia Baker, Department of Statistics, Rice University (graduation: fall 2017; chair: Genevera Allen, Rice University)

2015–2021 Ph.D. committee of David Wallace-Bradley, Department of Statistics, Rice University (chair: Marek Kimmel, Rice University)

2015–2017 Ph.D. committee of Frederick Campbell, Department of Statistics, Rice University (graduation: fall 2017; chair: Genevera Allen, Rice University)

2015–2016 Ph.D. committee of Yue Hu, Department of Statistics, Rice University (graduation: spring 2016; chair: Genevera Allen, Rice University)

2014–2015 Ph.D. committee of Yang Ni, Department of Statistics, Rice University (graduation: fall 2015; chairs: Francesco Stingo and Veerabhadran Baladandayuthapani, University of Texas, MD Anderson Cancer Center)

2014–2015 Ph.D. committee of Linlin Zhang, Department of Statistics, Rice University (graduation: spring 2015; chair: Marina Vannucci, Rice University)

2014–2017 Ph.D. committee of Quan Zhou, Department of Molecular and Human Genetics, Baylor College of Medicine (graduation: spring 2017; chair: Yongtao Guan, Baylor College of Medicine)

Additional advising of graduate students

2024 Pegah Golestaneh (remote and in person between October and December 2024), Department of Mathematics, University of Hamburg, Germany (with Johannes Lederer)

2024 Chenyu Lou, Department of Statistics, Pennsylvania State University

2020–2021 Advisor of Sean Eli, Department of Statistics, Rice University

2019–2020 Advisor of Xiaochen Long, Department of Statistics, Rice University

2014 Advisor of summer project of Pamela Luna, Department of Statistics, Rice University. Instructor, Baylor College of Medicine

Advising of undergraduate students

2023 Advisor of research project, Darby Gluscevich-Kepner, Department of Statistics, Pennsylvania State University (with Yubai Yuan)

2015 Advisor of summer project, Shan Zhong, Department of Statistics, Rice University

2014 Advisor of Stat 450 senior design project, Sarah Percival, Rice University.

Professional memberships

Institute of Mathematical Statistics

American Statistical Association

International Network for Social Network Analysis

International Society for Bayesian Analysis

Service: national and international institutions

- 2024 Reviewer of research grant proposal, Deutsche Forschungsgemeinschaft (DFG), the German equivalent of the U.S. National Science Foundation (NSF)

- 2023 Reviewer of research training grant proposal, Deutsche Forschungsgemeinschaft (DFG), the German equivalent of the U.S. National Science Foundation (NSF)

- 2023 Reviewer of grant proposal, Deutsche Forschungsgemeinschaft (DFG), the German equivalent of the U.S. National Science Foundation (NSF)

- 2021 Panelist, U.S. National Science Foundation (NSF)

- 2020 Reviewer of grant proposal, Netherlands Organisation for Scientific Research (NWO), the Dutch equivalent of the U.S. National Science Foundation (NSF)

- 2019 Discussant, Workshop "Using Models to Estimate Hog Production" organized by the Committee on National Statistics, U.S. National Academies of Sciences, Engineering and Medicine (NASEM), Washington, D.C.

- 2019 Reviewer of workshop proposal, Banff International Research Station (BIRS) for Mathematical Innovation and Discovery, Banff, Canada

- 2017 Panelist, U.S. National Science Foundation (NSF)

- 2016 Reviewer of grant proposal, U.S. National Science Foundation (NSF)

- 2015 Reviewer of ERC starting grant proposal, European Research Council (ERC), the European equivalent of the U.S. National Science Foundation (NSF)

Service: organizational activities

- 2024 Member of Scientific Program Committee, International Conference on Computational and Methodological Statistics (CMStatistics 2024), London, UK

- 2024 Session Chair, International Conference on Computational and Methodological Statistics (CMStatistics 2024), London, UK

- 2024 Co-organizer along with Cornelius Fritz, Workshop "Next-level Exponential Random Graph Models for large Networks", International Sunbelt Social Network Conference, Edinburgh, Scotland

- 2023 Co-chair of Organizing Committee along with Co-Chair Lingzhou Xue, Statistical Network Science with Applications Conference (SNSA 2023), Department of Statistics, Pennsylvania State University, University Park, PA. Other committee members: David R. Hunter, Xiaoyue Niu, and Yubai Yuan.

- 2023 Co-organizer along with Pavel N. Krivitsky and Johan Koskinen, Symposium "Sampling Subnetworks and Learning from Sampled Subnetworks about Population Networks", International Sunbelt Social Network Conference, Portland, OR

- 2020 Session Chair, International Conference on Computational and Methodological Statistics (CMStatistics 2020), London, UK

- 2019 Member of Scientific Program Committee, International Conference on Computational and Methodological Statistics (CMStatistics 2019), London, UK

- 2019 Session Chair, International Conference on Computational and Methodological Statistics (CMStatistics 2019), London, UK

Service: editorial service

Please see "Editorial positions" on page 2.

Service: reviewer of research papers and book proposals

I have served as a reviewer for more than 115 journal submissions for 42 leading journals in theoretical, computational, and applied statistics, machine learning, network science, and computational social science:

- Annals of Applied Statistics

- Annals of Statistics

- Bayesian Analysis

- Bernoulli

- Biometrika

- Computational Statistics

- Computational Statistics and Data Analysis

- Electronic Journal of Statistics

- Journal of the American Statistical Association

- Journal of Business & Economic Statistics

- Journal of Computational and Graphical Statistics

- Journal of Educational and Behavioral Statistics

- Journal of Machine Learning Research

- Journal of Mathematical Sociology

- Journal of Multivariate Analysis

- Journal of Official Statistics

- Journal of the Royal Statistical Society, Series A

- Journal of the Royal Statistical Society, Series B

- Journal of the Royal Statistical Society, Series C

- Journal of Statistical Planning and Inference

- Journal of Statistical Software

- Journal of Supply Chain Management

- Machine Learning

- Metrika

- Network Science

- Proceedings of the National Academy of Sciences (PNAS)

- Psychometrika

- Science

- Scientific Reviews

- Social Networks

- Social Science Research

- Sociological Methods and Research

- Spatial Statistics

- Springer: review of book proposal

- Stat

- Statistical Analysis and Data Mining

- Statistics and Computing

- Statistics and Its Interface

- Statistical Science

- Statistical Methodology

- Statistics and Probability Letters

- Statistica Sinica

- Wiley Interdisciplinary Reviews: Computational Statistics

- Wiley (Mathematics & Statistics): reviewer of book proposal

Service: university

- Spring 2018 Temporary representative for Senator Marek Kimmel, Faculty Senate, Rice University

- 2015-2016 Faculty Information System replacement project, Rice University

Service: department

- 2024–2025 Chair of Tenure-Track Hiring Committee, Department of Statistics, Pennsylvania State University

- 2024–2025 Faculty Awards Committee, Department of Statistics, Pennsylvania State University

- 2024–2025 Founder and coordinator of Causal Inference reading group, Department of Statistics, Pennsylvania State University

- 2023–2024 Graduate Admissions Committee, Department of Statistics, Pennsylvania State University

- 2022–2023 Tenure-Track Hiring Committee, Department of Statistics, Pennsylvania State University

- 2022–2023 Graduate Admissions Committee, Department of Statistics, Pennsylvania State University

- 2022–present Promotion & Tenure Committee, Department of Statistics, Pennsylvania State University

- 2019–2020 Coordinator and Examiner of the Ph.D. Qualifying Exam in Statistics (with Marek Kimmel in Probability), Department of Statistics, Rice University

- 2019–2020 Graduate Curriculum Review Committee, Department of Statistics, Rice University

- 2019–2020 Graduate Review Committee, Department of Statistics, Rice University

- 2018–2019 Coordinator and Examiner of the Ph.D. Qualifying Exam in Statistics (with Marek Kimmel in Probability), Department of Statistics, Rice University

- 2018–2019 Graduate Review Committee, Department of Statistics, Rice University

- 2017–2018 Coordinator and Examiner of the Ph.D. Qualifying Exam in Statistics (with Marek Kimmel in Probability), Department of Statistics, Rice University

- 2017–2018 Ph.D. Admissions Committee, Department of Statistics, Rice University

- 2015–2016 Faculty Search Committee, Department of Statistics, Rice University

- 2015–2016 Graduate Review Committee, Department of Statistics, Rice University

- 2014–2015 Graduate Review Committee, Department of Statistics, Rice University

- 2014–2015 Ph.D. Admissions Committee, Department of Statistics, Rice University

- 2013–2014 Faculty Search Committee, Department of Statistics, Rice University

- 2013–2014 Ph.D. Admissions Committee, Department of Statistics, Rice University

- 2014 Jury, Engineering Design Showcase and Poster Competition, Brown School of Engineering, Rice University: Senior Design Projects in Statistics

- 2013 Jury, Poster Competition, 4th Eubank Conference on Real World Markets: Creating Growth. Entrepreneurship and Analytics, Rice University
